

Spare Parts Service

Our warehouses are well stocked with key spare parts for a fast and flexible response to short-term requests. We also manufacture customised parts for your individual applications.

Are you planning on carrying out preventive maintenance? Talk to us!

Remote Maintenance

Remote support via video calls. We connect you live with one of our service technicians for jointly identifying and resolving malfunctions of your compounding line from afar. With the help of augmented reality we offer a solution for digital remote maintenance.

FEDDEM Cleaning Unit

Electrically driven special cleaning device with two brushes for cleaning the figure-8-shaped boring of twin screw extruders at operating temperature. This considerably reduces cleaning times when a screw change is required.

Wear Measurement

- Wear measurement of barrels and screws
- Documentation of the measurement results
- Recommendations for action
- Service also available for other extruder brands
